

8.2.1 Residential Water Use by Source (Billion Gallons per Day)

<u>Year</u>	<u>Total Residential Water Use</u>	<u>From Public Supply</u>	<u>Self-Supplied</u>
1980	25.4	22.0	3.4
1985	24.3	21.0	3.3
1990	25.3	21.9	3.4
1995	26.1	22.7	3.4
2000	28.0 (1)	24.4 (1)	3.6

Note(s): 1) USGS did not provide estimates of residential use from public supplies in 2000. This value was estimated based on the residential split of public supply in 1995 and applied to the total public supply water use in 2000. Self-supply water use: Water withdrawn from a groundwater or surface-water source by a user rather than being obtained from a public supply. Public supply water use: water withdrawn by public and private water suppliers that furnish water to at least 25 people or have a minimum of 15 connections.
